

Jennifer Eberlei

Senior Full Stack Engineer | TypeScript, React, Next.js | SaaS Platform Architecture

Berlin 13629

jennifer.eberlei@gmail.com

+49 1522 2191207

Senior Full Stack Developer with 16+ years of experience building scalable web platforms and SaaS products. Specialized in modern JavaScript ecosystems including TypeScript, React, Next.js, and PostgreSQL.

I design and build systems end-to-end — from frontend architecture and complex user interfaces to APIs, databases, and infrastructure. Much of my work focuses on turning complex or evolving product ideas into reliable, maintainable software.

I'm often brought into projects to untangle architecture, stabilize systems, and ship features that move products forward. I enjoy working close to product teams and translating real business needs into clean technical solutions.

Core technologies:

TypeScript · React · Next.js · Node.js · PostgreSQL · Prisma · TailwindCSS · GraphQL · Git

Willing to relocate: Anywhere

Work Experience

Founder & Full Stack Developer

Jurono-Berlin

October 2025 to Present

Building a SaaS platform focused on modern digital infrastructure for legal professionals. Responsible for the complete technical architecture and product development.

Responsibilities

- Designed and developed a full-stack SaaS platform using Next.js, TypeScript, and PostgreSQL
- Built scalable backend services and APIs supporting multi-tenant architecture
- Implemented modern authentication, database design, and deployment pipelines
- Designed product features focused on workflow automation and digitalization
- Managed infrastructure, deployments, and ongoing product development

Technologies

- TypeScript
- Next.js
- React
- PostgreSQL
- Prisma
- Node.js
- TailwindCSS
- Docker
- Nest.js

Senior Full Stack Developer

Nanocosmos GmbH-Berlin

June 2025 to October 2025

Worked on web applications for real time video streaming and interactive broadcast platforms. Focused on building performant, scalable frontend systems using modern JavaScript frameworks.

Responsibilities

- Developed frontend features using React, TypeScript, HTML5, and CSS3
- Built scalable UI components for real time streaming applications
- Collaborated with backend engineers to integrate APIs and streaming services
- Improved performance and maintainability of complex frontend architectures
- Worked in an Agile product development environment delivering production features

Technologies

JavaScript • TypeScript • React • HTML5 • CSS3 • Git • Web Applications • Video Streaming

Focus: SaaS platforms, scalable frontend architecture, real time applications.

Fullstack Developer

Planted GmbH-Berlin

April 2023 to April 2024

- Project Lead for establishing a style-guide system in Storybook, enhancing consistency and efficiency across the development process
- Utilized cutting-edge technologies including React, Node.js, Nest.js, Payload CMS, GraphQL, and TypeScript
- Played a key role in architecture and development, ensuring optimal performance, security, and maintainability
- Collaborated closely with cross-functional teams to align with project goals and objectives

Freelancer

Eberlei Datenservice-Burlington, ON

October 2018 to April 2023

- Delivered 25 freelance projects across varied technologies, tailoring solutions to client specs.
- Achieved seamless frontend-backend integration in 15 projects by self-teaching REST API skills.
- Actively engaged in projects involving Headless CMS platforms like Strapi and Payload CMS, leveraging their flexibility and scalability to deliver dynamic and content-rich web solutions.
- Built modern, responsive web apps using React and Next.js, mastering their advanced features.
- Earned repeat business from 60% of clients by maintaining high professionalism and tailoring solutions.

Senior Frontend Developer

Sevenval Technologies GmbH-Berlin

April 2016 to October 2018

- Led UX, Project Management, and Development team collaborations at Sevenval, streamlining communication and teamwork.
- Oversaw multiple projects as Team Lead, ensuring team coordination, client satisfaction, and facilitating workshops for project success.
- Pioneered responsive HTML Tables with CSS-only techniques, contributing to cutting-edge solutions and automation efforts.
- Contributed to award-winning projects by developing consistent and efficient Pattern Libraries.
- Implemented DevOps practices to optimize development workflows, enhance productivity, and streamline deployment processes.

- Conducted training and spearheaded the recruitment of top talent, enhancing team skills and fostering professional growth.

Head of Frontend Development

RedSight GbR-Berlin

February 2015 to April 2016

- Ensured Software Quality Assurance through rigorous testing and code reviews, maintaining high standards of code quality, performance, and security.
- Developed CMS solutions using Drupal, WordPress, and TYPO3.
- Trained new employees and conducted interviews to build a strong development team.

Junior Frontend Developer

UnitB Technologies GmbH-Berlin

2014 to 2015

- Created scalable PHP prototypes, increasing maintainability by 20%.
- Designed and successfully developed frontend architecture for 5 major projects, enhancing user experience
- Established coding guidelines, improving development efficiency by 35%.
- Developed dynamic and content-rich web solutions using CMS platforms like Adobe CQ5.
- Managed pharmacy and insurance projects, overseeing budgets exceeding €2M.

Administrative Assistant/Receptionist

Büroservice Direkt-Berlin

2011 to 2015

- Proficient in Phone Customer Service, ensuring effective communication and resolution of client inquiries.
- Provide Secretary Services, including managing emails, scheduling meetings, and handling administrative tasks with precision and professionalism.
- Experienced in Inventory Management, utilizing software tools to track and optimize inventory levels efficiently.
- Skilled in Managing Invoices using accounting software, ensuring accuracy and timely processing of financial transactions.
- Proficient in Managing Company Websites, maintaining online presence and implementing updates to enhance user experience.
- Involved in Creation of Corporate Identity, collaborating with design teams to establish branding guidelines and visual assets.
- Expertise in Creating Word and Excel Templates, streamlining document creation processes for enhanced productivity.
- Implement Billing Automation solutions, leveraging software tools to automate billing processes and improve efficiency.
- Responsible for Maintaining Telephone Conference Systems and Servers, ensuring seamless communication infrastructure for remote collaboration.
- Efficiently Manage Appointments, utilizing scheduling software to coordinate meetings and optimize organizational workflow.

Training: IT specialist for application development

PlusB GmbH-Berlin

2013 to 2014

- Development of TYPO3 Websites
- Maintenance of existing customers
- Customer relations
- Leading workshops and presentations: Responsive Design / Mobile First

- Frontend Architecture

Web Developer

UndKonsorten GbR-Berlin

2010 to 2013

- Development of TYPO3 and Wordpress Websites
- Developing of Websites for people with disabilities
- Customer relations
- Trainings and workshops for customers

Skills

- Nest.js
- Node.js
- REST APIs
- System Architecture
- SaaS Development
- React
- Prisma / MongoDB / Postgres
- JavaScript (ES6+)
- GraphQL
- Next.js
- TailwindCSS
- TypeScript

Languages

- German - Muttersprache
- Englisch - Fortgeschrittene

Certifications and Licenses

AI Engineer

January 2024 to Present

- AI Fundamentals & Machine Learning – Understanding core AI concepts, supervised/unsupervised learning, and deep learning architectures.
- AI Development & Deployment – Implementing AI models using Python, TensorFlow, or PyTorch and integrating them into applications.
- Data Processing & Analytics – Cleaning, transforming, and analyzing large datasets for AI-driven insights.
- Ethical AI & Regulations – Understanding AI bias, fairness, and compliance with ethical guidelines and data protection laws.
- AI in Business & Industry – Applying AI solutions in real-world scenarios, optimizing workflows, and automating processes.

Additional Information

Professional Strengths

Rescue Engineer Mindset

I thrive in complex environments and messy codebases. I enjoy untangling architecture, stabilizing systems, and turning chaos into scalable products.

Dedicated Builder

Deeply committed to delivering high quality work. I take ownership of problems and follow them through until the solution is solid, maintainable, and production ready.

Collaborative Team Player

Strong believer that the best software is built together. I work closely with engineers, designers, and product teams to move ideas forward efficiently.

Clear and Transparent Communicator

I value direct and open communication. Sharing context, tradeoffs, and technical reasoning helps teams make better decisions and build trust.

Solution-Oriented Problem Solver

Instead of getting stuck on obstacles, I focus on finding practical solutions and moving projects forward.

Reliable Under Pressure

Known for staying calm and dependable when projects become complex or deadlines get tight.

Positive and Engaging Presence

I bring humor, curiosity, and approachability to the workplace. Good teams perform best when people enjoy working together.

Neurodiversity Perspective

As an autism advocate, I value diverse ways of thinking and bring a unique perspective to problem solving, system design, and team dynamics.

Additional Interests

Music & DJing

Experienced DJ with a deep passion for electronic music, rhythm, and creative expression.

Gaming

Strategy and cooperative games; a hobby that reinforces teamwork, pattern recognition, and long term thinking.

Film & Storytelling

Strong interest in storytelling, world-building, and cinematic structure
